Associate QA Analyst

Who is WellRight?

WellRight is a leading provider of corporate wellness software, used by organizations to improve the health of their employees. Our mission is to change people for good through positive habit formation. We provide a fun, energetic, and supportive environment to work in. Our solutions are industry-leading and built on the latest web-scale, cloud technologies.

Who you are.

We are looking for an Associate QA Analyst that is passionate about building high-quality software to become an integral part of our team. This is an entry-level position and does not require formal experience in QA. The candidate should be tech-savvy, detail-oriented, analytical, able to handle multiple priorities and meet tight deadlines and of course hungry to learn all about software testing.

Why work here?

We believe a career should provide competitive pay, benefits, and a collaborative and supportive work environment. That's why we offer great perks like healthy lunch on Tuesdays, WellRight workouts, flex time off to volunteer in your community and unlimited PTO. We practice what we preach and use our own technology and services to enrich the lives of our employees!

Responsibilities & Duties

- Work with engineering and product management to understand business requirements of new features and functionality changes
- Develop and execute test cases to verify changes in accordance with acceptance criteria
- Document test case execution results, report and verify defects
- Ensure highest quality delivery of web products and mobile apps
- Work with the customer support team to verify, troubleshoot, and identify reproducible steps for production issues

Qualifications & Skills

- Comfortable using common software applications, such as Google Sheets & Docs
- A high level of integrity, dependability, & enthusiasm
- Functions best in a collaborative environment and is a team player
- Is a self-starter and takes initiative to streamline current processes in place
- Is detailed orientated, analytical and has exceptional problem-solving & troubleshooting skills
